

General Illumination MRI Square Downlight

6"

Feature Set

- Bounding Ray™ optical design
- Unitized optics mechanically attach the light engine to the lower reflector for complete optical alignment.
- 45° cutoff to source and source image
- Fully serviceable and upgradeable lensed LED light engine
- 70% lumen maintenance at 60,000 hours
- 2.5 MacAdam Ellipse; 85 CRI typical, 90+ CRI optional
- Non-ferrous construction for use in MRI
- Remote mount driver(s) for MRI applications
- Fixtures are wet location, covered ceiling
- Available with 10% dimming, 1% dimming, or dim to dark
- Batwing distribution with feathered edges provides even illumination on horizontal and vertical surfaces
- UGR of zero for fixtures aimed at nadir with a cut-off equal to or less than 60deg per CIE 117-1995 Discomfort Glare in Interior Lighting. [UGR FAQ](#)

ACCESSORIES — order as separate catalog numbers (shipped separately)

EVOMRIF 4-channel MRI filter (Class 2 100W; 3A/up to 40VDC; insertion loss 100dB between 10Khz-1Ghz)

ORDERING NOTES

1. Not available with Lens Setting.

2. Not available with "Finish" options.

3. Only available with "Lensed Setting" options.

4. Not applicable with painted reflectors (ex: BR, WR, WRAMF, TRALTB, TCPC).
5. Specify voltage.

6. For use with generator supply EM power. Will require an emergency hot feed and normal hot feed.

7. Zones only apply when nLight options are ordered. See chart for zone wiring specifications.

Optical Assembly

Fully serviceable and upgradeable lensed LED light engine suitable for field maintenance or service from below the ceiling.

Optical design is a Bounding Ray™ design with 45° cutoff to source and source image. Top-down flash characteristic for superior glare control.

Unitized optics shall have mechanical attachment of the light engine to the lower reflector for complete optical alignment with anti-microbial flush and re-gressed lenses.

Electrical

The luminaire shall operate from a 50 or 60 Hz ± 3 Hz AC line over a voltage ranging from 120 VAC to 277 VAC. The fluctuations of line voltage shall have no visible effect on the luminous output.

The luminaire shall have a power factor of 90% or greater at all standard operating voltages and full luminaire output.

Sound Rated A+. Driver shall be >80% efficient at full load across all input voltages.

Input wires shall be 18AWG, 300V minimum, solid copper. All drivers are ROHS compliant.

0-10V dimming drivers available with choice of 10%, 1% or <1% dimming levels.

nLight enabled option for 1 or 2 zones per driver box

48Vdc output to MRI room

Controls

Luminaire shall be equipped with interface for nLight wired network with integral power supply as per specification.

Dimming

The luminaire shall be capable of continuous dimming without perceivable stroboscopic flicker as measured by flicker index (ANSI/IES RP-16-10) over a range of 100 – 10%, 100 – 1.0% or 100 – 0.1% of rated lumen output with a smooth shut off function to step to 0%.

elddLED LED drivers shall conform to IEEE P1789 standards. Alternatively, manufacturers must demonstrate conformance with product literature and testing which demonstrates this performance. Systems that do not meet IEEE P1789 will not be considered.

Driver is inaudible in 24dB environment, and stable when input voltage conditions fluctuate over what is typically experienced in a commercial environment.

Construction

Non-ferromagnetic construction suitable for use in rooms containing magnetic resonance equipment.

Maximum 1-1/2" ceiling thickness

Telescopic mounting bars maximum of 27-1/2" and minimum of 20-1/4"

The assembly and manufacturing process for the luminaire shall be designed to assure all internal components are adequately supported to withstand mechanical shock and vibration.

25°C ambient temperature standard (1/2" clearance on all sides from non-combustible materials in non-IC applications, unless marked spacing noted otherwise). For use in insulated ceilings, a 3" clearance on all sides from insulation is required (unless marked spacing noted otherwise).

EMI filter required – one per luminaire (supplied by others). See list of recommended filter providers on installation instruction sheet

Remote driver box easily mounts to wall outside shielded MRI room, controls up to 6 EVO MRI downlights, and is constructed of 20 gauge black painted steel

Listings

Fixtures are CSA certified to meet US and Canadian standards; wet location, covered ceiling

IP64 rated with lensed trims. Consult installation instruction sheet for details regarding attaining IP65 rating via additional installation steps.

Photometrics

LEDs tested to LM-80 standards. Measured by IESNA Standard LM-79-08 in an accredited lab. Lumen output shall not decrease by more than 30% over the minimum operational life of 60,000 hours.

Color appearance from luminaire to luminaire of the same type and in all configurations, shall be consistent both initially and at 60,000 hours and operate within a tolerance of <2.5 MacAdam ellipse as defined by a point at the intersection of the CCT line and the black body locus line in CIE chromaticity space.

Buy American Act

This product is assembled in the USA and meets the Buy America(n) government procurement requirements under FAR, DFARS and DOT regulations.

Please refer to www.acuitybrands.com/buy-american for additional information.

Warranty

5-year limited warranty. This is the only warranty provided and no other statements in this specification sheet create any warranty of any kind. All other express and implied warranties are disclaimed. Complete warranty terms located at: www.acuitybrands.com/support/warranty/terms-and-conditions

Note:

Actual performance may differ as a result of end user environment and application.

All values are design or typical values, measured under laboratory conditions at 25 °C.

A+ Capable Luminaire

This item is an A+ capable luminaire, which has been designed and tested to provide consistent color appearance and out-of-the-box control compatibility with simple commissioning.

- All configurations of this luminaire meet the Acuity Brands' specification for chromatic consistency
- This luminaire is part of an A+ Certified solution for nLight® control networks when ordered with drivers marked by a shaded background*
- This luminaire is part of an A+ Certified solution for nLight® control networks, providing advanced control functionality at the luminaire level, when selection includes driver and control options marked by a shaded background*

To learn more about A+, visit www.acuitybrands.com/aplus.

EXAMPLE

nPS 80 EZ Dimming/Control Pack installed in remote driver box (example shows 1 and 2 zone configuration)

nPODM 2P DX Dual On/Off/Dim Push-Button WallPod

Description: This design provides a dual on/off/dim wall station that enables manual control of one or two nLight zones from outside the MRI room. Utilizing a WallPod in the control room gives the MRI technician the ability to control multiple zones of light to maximize patient comfort during the scan as well as provide higher levels of light for exams that require greater visual acuity.

nLight® Control Accessories:

Order as separate catalog number. Visit www.sensorswitch.com/nLight for complete listing of nLight controls.
