

MARKCOVE

INTEGRATED COVE LUMINAIRE
STATIC WHITE & COLOR

HIGHLIGHTS

- Created for integration with the MARKCOVE MCVE integrated cove extrusion profiles (sold separately)
- Available in 2, 3, and 4-foot lengths
- Two distributions:
Asymmetric and Symmetric
Injection molded optics for consistent aesthetic appearance
- Lumen outputs from 400 to 1200 lumens per foot
- Five static white color temperatures in two CRI options
- Cable and wire splice box selections available for installation ease
- Optional fixed mount hardware for independent mounting
- Flicker-free dimming to dark (0.1%) powered by eldoLED® drivers
- Alternate DALI, ELV, and Lutron® dimming solutions available
- nLight® enabled system networking wired and wireless
- Standard in semi-gloss white powder paint finish with optional RAL, or custom color selections
- Total System Integration features a 5-year limited warranty by Acuity Brands covering all components and construction

Lumen Multiplier Table, Static White only

Data table baseline is 3500K 80CRI photometry. This table can be used to approximate the lumen values at different Kelvin temperatures and Color Rendering Index. Power consumption would stay the same.

CCT	CRI	Multiplier
27K	80	0.960
30K	80	0.991
35K	80	1.000
40K	80	1.000
50K	80	1.052
27K	90	0.815
30K	90	0.833
35K	90	0.854
40K	90	0.869
50K	90	0.927

Lumen Multiplier Table for when used in CVE Extrusion
For both Static White and Color

This table can be used to approximate the lumen values at different Kelvin temperatures and Color Rendering Index. Power consumption would stay the same.

Distribution	Lens	Multiplier
ASYM	none	0.849
120X120DEG	none	0.904
ASYM	clear	0.780
120X120DEG	clear	0.835
ASYM	frosted	0.763
120X120DEG	frosted	0.818

MARKCOVE
Integrated Cove Luminaire
Static White & Color

LINEAR PLAN

Mark offers the ability to provide a continuous run plan to suit your requirements by optionally offering three methods of configuration.

LLP Longest Length Possible:
In this plan the longest length available is optimized resulting in the fewest segments and mounting locations. Caution should be used where balanced appearance is a concern. Example: 22FT row would have (5) 4FT segments and (1) 2FT segment located at one end.

LSL Longest Same Length:
In this configuration each segment is the same length is standardized based on the longest length available and is the only option provided. Because it is dependent on one segment length there are mathematical limitations on what overall row lengths can be achieved. Example: 20FT row would be achieved with (5) 4FT long segments equaling 20FT (nominal).

LCB Longest Center Balanced:
This configuration incorporates the longest center segment(s) along with any additional lengths required to fill located at each end. Example: 22FT row would have (2) 3FT segments (one at each end) and (4) 4FT intermediate segments located in between.

Integrated Cove Luminaire
Static White & Color

SYSTEM WIRING (WHEN NOT USED WITHIN MCVE COVE EXTRUSION)

Basic system wiring diagram provides an overview of components and materials required for a simple installation of MCV504 luminaires controlled by building system power (By Others). These diagrams should not be used in place of actual installation instructions or submittal drawings prepared for a specific project.

For Non-Dimming, 0-10v Dimming, ELV, DALI, and ECOD Lutron 3-foot & 4-foot units in run only

For 2-foot fixture with ECOD in run

SYSTEM WIRING (WHEN NOT USED WITHIN MCVE COVE EXTRUSION)

Basic system wiring diagram provides an overview of components and materials required for a simple installation of MCV504 luminaires controlled by building system power (By Others). These diagrams should not be used in place of actual installation instructions or submittal drawings prepared for a specific project.

For runs with nLight or nLight Air options

For runs with 347v options

ACCESSORY OPTIONS

Conduit Whip Box

Required when using MARKCOVE MKCE cove extrusion

*Minimum of one required per fixture run

Series

MCVFWP Conduit Whip

Conduit whip box allows for proper wire termination from building supply wire, through wall, into extrusion, and to fixture run

Feed Cable, Left Feed (Female Plug)

*Minimum of one required per fixture run when not using MARKCOVE MKCE cove extrusion

Series

- MFCLC10L Left 10FT Feed Cable (Female)
- MFCLC25L Left 25FT Feed Cable (Female)
- MFCLC50L Left 50FT Feed Cable (Female)
- MFCLC100L Left 100FT Feed Cable (Female)

Carries 120-277 line voltage power to left end of first fixture in run.

Use one feed cable per run only.

Feed Cable Right Feed (Male Plug)

*Minimum of one required per fixture run when not using MARKCOVE MKCE cove extrusion

Series

- MFCLC10R Right 10FT Feed Cable (Male)
- MFCLC25R Right 25FT Feed Cable (Male)
- MFCLC50R Right 50FT Feed Cable (Male)
- MFCLC100R Right 100FT Feed Cable (Male)

Carries 120-277 line voltage power to right end of first fixture in run.

Use one feed cable per run only.

Wire Splice Box, Left Feed (Female Plug) *Optional*

*Minimum of one wire splice box, left or right, per fixture run when not using MARKCOVE MKCE extrusion

Series

MCVFBXL Wire Splice Box Left

Replaces feed cable for areas where flexible cord cannot be used to bring 120-277 line voltage power to left end of first fixture in run. Box allows 1/2" NPT conduit fitting connection and area for building wire splice connections.

Use one wire splice box per run only.

7/8" KNOCKOUT

Wire Splice Box, Right Feed (Male Plug) *Optional*

*Minimum of one wire splice box, left or right, per fixture run when not using MARKCOVE MKCE extrusion

Series

MCVFBXR Wire Splice Box Right

Replaces feed cable for areas where flexible cord cannot be used to bring 120-277 line voltage power to right end of first fixture in run. Box allows 1/2" NPT conduit fitting connection and area for building wire splice connections.

Use one wire splice box per run only.

7/8" KNOCKOUT

ACCESSORY OPTIONS

Jumper Cable *Optional*

Series	
MJCLC100	100FT Jumper Cable
MJCLC4	4FT Jumper Cable
MJCLC2	2FT Jumper Cable
MJCLC4IN	4 Inch Jumper Cable
MJCLC8IN	8 Inch Jumper Cable

Carries 120-277 line voltage power between two units in a run when larger spacing or corner turn between units is required. Jumpers may be plugged together to create longer jumper. For every jumper-to-jumper connection, calculate as a 2-foot fixture to apply proper voltage drop.

*Reference separate spec sheet and installation documents for additional MCVE Extrusion and MCV504 Luminaire details.

SPECIFICATIONS

Housing

Extruded aluminum housing with fabricated steel gear tray and composite endcaps

Optic

Injection molded acrylic optic (ASYM) or injection molded clear acrylic diffuser (120X120DEG)

Finish

Polyester powder coat paint finish in Semi-Gloss White color for housing and gear tray. Composite endcaps are supplied in natural white material. Consult factory for custom colors or specify RAL colors from Architectural brochure.

Mounting

Mounts directly into MARKCOVE MCVE cove extrusion or on any flat surface via MCFMC fixed mount clip accessory

Source

Five LED lumen packages provided for five available color temperatures (2700K, 3000K, 3500K, 4000K, and 5000K) in two CRI (80 or 90) options - LED color variation no greater than a 1.5 MacAdam ellipse from board-to-board. Also available in four available static colors: RED (623nm), GREEN (528nm), BLUE (470nm), and AMBER (590nm).

LED Life

LED light engine — consisting of linear LED boards of 12 LEDs per 12 inches Static white LEDs are rated for 80,000 hours (L80) at +25° C ambient temperature. The color LEDs are rated for 120,000 hours (L70) at +25 °C ambient temperature.

Voltage

120 through 277v in 50 to 60Hz; 347v available with supplied remote transformer

Controls and System Networking Options

Optional integrated nLight® controls make each run addressable - allowing it to digitally communicate with other nLight enabled controls such as dimmers, switches, occupancy sensors, and photocontrols. Connection to nLight is simple. It can be accomplished with remote nLight AIR wireless or through standard Cat-5 cabling. (cabling "by others") nLight offers unique plug-and-play convenience as devices and luminaires automatically discover each other and self-commission, while nLight AIR is commissioned easily through an intuitive mobile app.

Dimming Driver

eldoLED® driver provides smooth, continuous, flicker-free dimming to dark <1%. THD: < 20%. Insignificant inrush current at 120 and 277VAC. FCC Class A and B tested for EMI and RFI. Driver will be set for Linear dimming curve.

Other dimming selections, 0-10V, DALI, ELV, and Lutron high-performance driver options, also available.

Environment

Suitable for dry or damp location

Certification

CSA Certified to meet U.S. and Canadian standards conforming to UL 1598 and CAN/CSA C22.2 No. 250.0

Compliance

Buy American Act compliant

Government Procurement

BAA - Buy America(n) Act: Product qualifies as a domestic end product under the Buy American Act as implemented in the FAR and DFARS. Product also qualifies as manufactured in the United States under DOT Buy America regulations. BABA - Build America Buy America: Product qualifies as produced in the United States under the definitions of the Build America, Buy America Act. Please refer to www.acuitybrands.com/buy-american for additional information.

Warranty

5-year limited warranty. This is the only warranty provided and no other statements in this specification sheet create any warranty of any kind. All other express and implied warranties are disclaimed. Complete warranty terms located at: www.acuitybrands.com/support/warranty/terms-and-conditions

Note: Actual performance may differ as a result of end-user environment and application. All values are design or typical values, measured under laboratory conditions at 25 °C. Specifications subject to change without notice.

A+ Capable Luminaire

This item is an A+ capable luminaire, which has been designed and tested to provide consistent color appearance and out-of-the-box control compatibility with simple commissioning.

- All configurations of this luminaire meet the Acuity Brands' specification for chromatic consistency
- This luminaire is part of an A+ Certified solution for nLight® control networks when ordered with drivers marked by a shaded background*
- This luminaire is part of an A+ Certified solution for nLight control networks, providing advanced control functionality at the luminaire level, when selection includes driver and control options marked by a shaded background*

To learn more about A+, visit www.acuitybrands.com/aplus.

*See ordering tree for details
