

# Mini Round Instant Flexilight

The Mini Round Instant Flexilight, 3/8" in diameter and rated at 35,000 hours, is becoming the most popular rope light because of its smaller diameter. This design has become possible through a restructuring of wires and light bulbs inside the rope light. Therefore, the quality and life of the product has remained as high as the standard 1/2" rope light.

The exclusive use of the highest-quality PVC material along with UV additives makes this product suitable for both indoor and outdoor applications, and can withstand both freezing and scorching weather. Flashing light effects can be created if a controller is used. The Mini Round Instant Flexilight is suitable for making complicated patterns and designs with acute angles and dense lines. Its flexibility also makes it perfect for making smaller designs, such as portable signs and small home decorations.

Number of wire	2
Number of bulb/foot	12
